Course: 2101 - Social Engineering

Syllabus (4:50)

Follow along with Anthony and Fiona in Need to Know: Security by Design as they discover the importance of security by design and plan to secure a system from the ground up. Afterwards take a quick refresher with our Reporting Phishing Emails module that reviews the functionality of the PhishNotify button, which allows users to report suspicious emails to system administrators through Outlook, Office 365 and Gmail.

Complete the lesson by achieving a score of 80% or better.
